

ROBINSON WILLEY

Gas Fires

Robinson Willey - Taking Care of your Heating Needs

With a manufacturing pedigree that spans over 50 years, Robinson Willey is a name that is known and trusted.

Understanding and taking care of your heating needs is our number one priority and that's why quality, reliability, safety, energy efficiency and sustainability lie at the core of all our fires.

However, there are no compromises on style. Whether it's to add drama, create a stunning centre-piece or simply provide a warm welcome, our range of gas fires are designed to inspire and turn your house into a real home.

All our gas fires boast the ultimate in energy efficiency and safety, together with low running costs - and all without sacrificing authenticity.

Robinson Willey is part of the GDC Group Ltd, which is the UK heating division of the multi-national Glen Dimplex Group - one of the world's largest electrical heating businesses. Alongside Valor and Faber, the GDC Group boasts the largest and most powerful portfolio of gas fire names in the UK.

Being part of this strong and vibrant organisation not only enables Robinson Willey to take advantage of valuable group resources and significant investment in product innovation - it ensures the continued building of the much-loved RW brand.

What type of chimney does your home have?

Look at the pictures and decide which one best matches the chimney at your home then, when you're reading through our brochure and find a fire you like, simply check the illustrations shown on the page to see if it's suitable for the chimney at your property.

No Chimney (NC)

If you have no chimney then our balanced flue models are the solution here

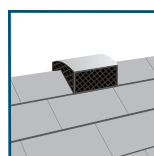

Pre-fabricated Flue (PF)

Suitable for most fires, dependent on the flue depth and diameter

Brick Chimney (BC)

Suitable for all gas fires

Pre-cast Flue (PCF)

Suitable for a wide range of gas fires

All our products carry the CE Mark complying with European Safety Standards

Our products are made in accordance with Quality Management System Standard ISO 9001

Robinson Willey gas fires are amongst some of the most energy efficient models available

When you are buying a fire for performance you will not be able to beat the Robinson Willey Range. All our fires come with a dedicated heat exchanger which means that the amount of convected heat is unsurpassed by any other fire of its kind. The flue gases are directed from the firebox into the heat exchanger and after scrubbing as much useful heat as it can the products of combustion are safely released into the flue.
