INTRODUCING

VitrA

ESSENTIALS

COLLECTION

2019

Introducing the Essential Collection from VitrA.

The bathroom demands great quality products at a great price, whatever the type of renovation project.

This brochure contains a selection of the essential bathroom products for all types of projects; single family bathrooms, medium-sized contracts or local business refurbishments.

VitrA have been leaders in bathroom product design for over 70 years, this selection of products provides the perfect combination of choice and quality all at a great price.

Speak to your local VitrA representative for more information or contact us on **01235 750990** or **info@vitra.co.uk**.

ICON GUIDE

SPACE SAVING

A wall-hung WC takes up less room than a conventional WC, and the concealed installation offers flexibility in confined spaces. The range of compact WCs have shorter projection, saving even more space.

WATER SAVING

VitrA water saving WCs, marked with this symbol, have a special bowl structure and are specifically designed to flush with both lower (2.5/4 litre) and typical (3/6 litre) water volumes. By using less water, whilst still delivering efficient flushing, these water saving WCs benefit you and the environment.

ACCESSIBLE

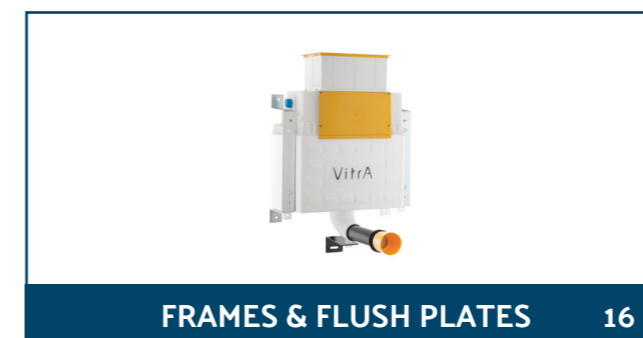

These products are wheelchair accessible and provide enhanced convenience in the bathroom.

COMFORT HEIGHT

These WC pans are taller than regular pans for added comfort and ease of use.

CONTENTS

GUARANTEES

Sanitaryware	10 years
Acrylic baths	25 years
Furniture and Mirrors	2 years
Brassware	10 years ¹
Accessories	5 years ¹
Toilet seats	2 years
Bath panels	2 years
Flush plates	5 years
Wall-hung Frames	5 years

If a product fails due to a manufacturing fault, VitrA will offer a free replacement or replacement parts. If a product is not available, VitrA will offer an alternative to the same value.

Every effort has been made to make the colours/finishes in this brochure as accurate as possible, however we cannot guarantee an exact match due to the printing process.

¹1-year guarantee on internal working parts.

SPECIFIC DESIGN FEATURES

Concealed behind a solid or stud wall, Vitra's frame systems are crucial to any modern bathroom, supporting and holding wall-hung WCs firmly in place. Vitra's frames

provide the freedom to create a stunning room without the need for expensive structural building work.

9 INTERMEDIARY HOSE

The intermediary hose that connects to the water piping inside the cistern can isolate the water flow during service-oriented interventions and enables easy replacement of parts.

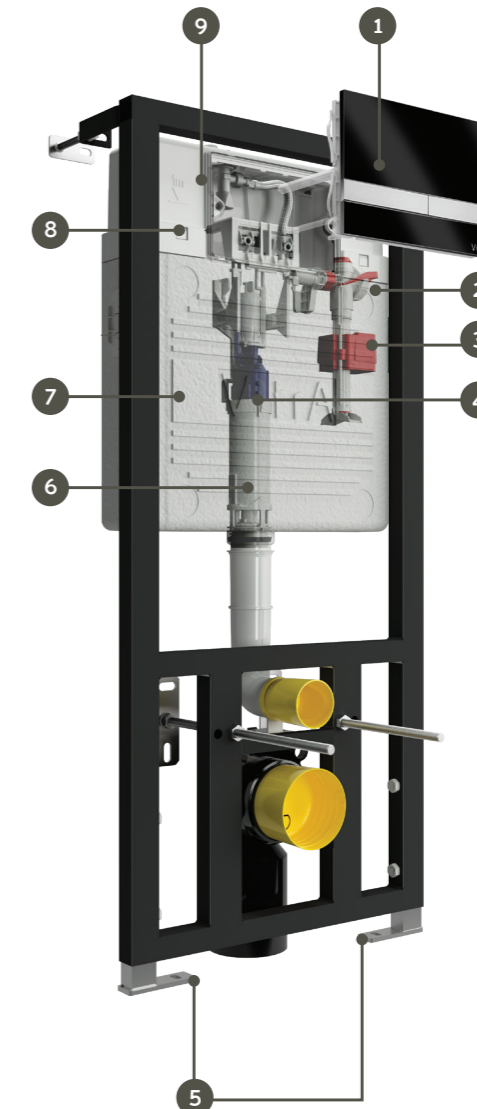

1 FLUSH PLATE

The flush plate operates the cistern. It enables easy operation of the wall-hung frame and covers internal parts that remain in the wall.

8 PANEL GAP

The panel gap on the body is designed to provide optimum opening space for the maintenance of the filling or flushing units and enabling easy access to the cistern. The size of this gap is very important for servicing purposes.

2 BODY

The filling and flushing valves are located in this part of the cistern. Produced from polyethylene (HDPE) raw materials, it offers more safety with its flexibility and resilience.

7 BODY STYROFOAM

The Styrofoam coats the entire lower body and prevents condensation forming in the cistern and provides sound insulation.

6 FLUSHING VALVE

The flushing valve transfers the water in the cistern to the WC pan. For correct and reliable functioning, flushing units are subjected to 200,000 water-tightness and accelerated life tests at the factory.

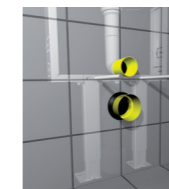

3 FILLING VALVE

The filling valve is the system that fills the cistern with water. The filling valve is checked in Vitra labs for "water-tightness" via accelerated life testing 200,000 times. The filters above the filling valve eliminate the risk of clogging, ensuring durability and a long lifetime. New Vitra filling systems ensure fast and silent filling.

5 METAL STAND

Metal feet enable the easy adjustment of height from the floor and provide fixing points.

4 OVERFLOW PIPE

When too much water enters the cistern, the overflow pipe in the flushing mechanisms channels the excess water into the WC pan, preventing the risk of flooding.

REGULAR HEIGHT

742-5805-01 3/6 litre, wall-hung frame – front-operated floor and wall fixation

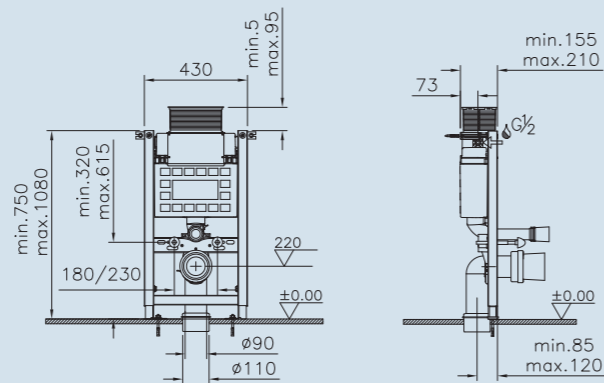

742-4800-01 3/6 litre, wall-hung frame – front-operated floor fixation

REDUCED HEIGHT

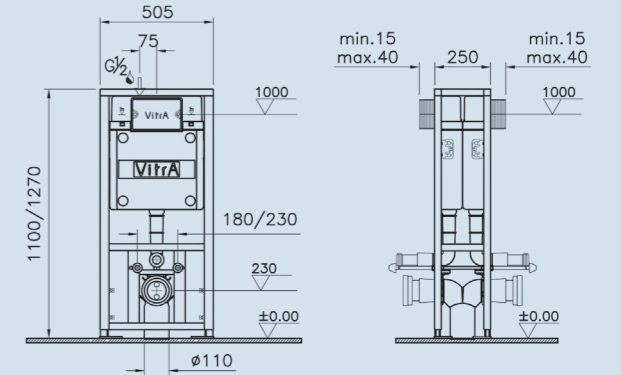

760-5805-01 3/6 litre, reduced height wall-hung frame

TWIN CISTERN

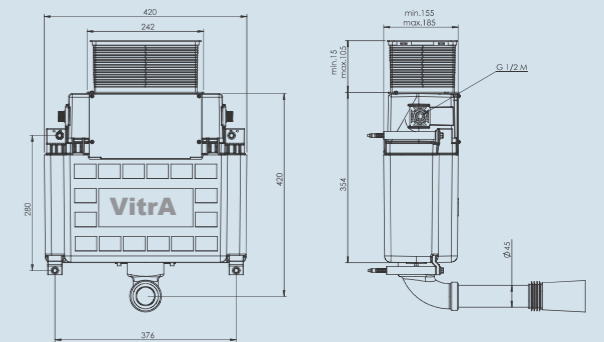

742-5850-01 3/6 litre, wall-hung frame – front-operated twin cisterns and floor fixation

CISTERN FOR BACK-TO-WALL WC PANS

760-1720-01 3/6 litre, low-height, concealed cistern for back-to-wall WC

See page 20 for wall-hung pans and flush plates

FLUSH PLATES

With a Vitra wall-hung frame, only the flush plate is visible; two buttons release either a large or small quantity of water. Vitra offer design solutions with different finishes and shapes, and designs feature an anti-fingerprint finish. This finish is extra hygienic, as it is easier to clean and protects against bacteria, perfect for a commercial setting.
