Decorative radiators

Our decorative radiators do not only make a home feel cosy but have also eye-catching designs.

Comfortable indoor ventilation

Our ventilation systems ensure a healthy indoor climate but operate with high energy efficiency, boost wellbeing, and retain the property value.

Heating and cooling ceilings

Our heating and cooling ceilings are energy efficient and versatile to fit multiple environments.

Industrial air cleaning

Our clean air solutions are transforming working environments and improving the performance of businesses everywhere.

always the best climate

Our mission is to provide a healthy indoor climate with top quality solutions. Living spaces are kept at a comfortable temperature by our radiators and heating & cooling ceilings whereas our ventilation solutions make sure that you can breathe fresh clean air 24/7.

global presence in over 70 countries

Your global partner for indoor climate

Trusted partner

We provide our customers with tailored services from planning to installation of excellent solutions for the best indoor climate since 1895.

Know what's next

Consistent focus on innovation has always been the motor for our business. We strive to provide intelligent solutions for ventilation, heating, and cooling.

Swiss quality and precision

Swiss quality and precision are reflected in all our products. Our design standards create timeless elegance in living spaces for yesterday, today, and tomorrow.

Know why, know how

It is our ongoing mission to share our expertise and know how with our customers by providing expert trainings. Our dedicated Zehnder academies bring indoor climate to life.

Zehnder Selection

The **Zehnder Selection** features classic and contemporary radiators for living areas and bathrooms which are selected and designed to not only make homes warmer, but also more attractive.

Zehnder Studio Collection

The **Zehnder Studio Collection** is an innovative range of decorative radiators that blend style and function. Developed with Zehnder's technical expertise and bold design principles, this collection represents the pinnacle of heating solutions.

Contents

Central Heating Radiators

Made to Measure options available

Delivery working days applies to stock items only.

Warranties

Our central heating radiators have a 5 year warranty as standard. Stainless steel, select aluminium radiators, and now our Zehnder Charleston range, benefit from a 10 year warranty.

Our electric radiators come with a 2 year warranty.

All our extractor fans have a 3 year warranty.

Electric Radiators

World of Colour options available

Delivery weeks applies to non-stocked items. Please be aware that bespoke radiators, including Made to Measure and Engineered to Order radiators, can take up to 8 weeks from time of order

Dual Energy Radiators

Special PVD finishes available

Suitable for domestic water

Exclusive aluminium finishes available

Alban

This stainless steel towel warmer looks fabulous in contemporary interiors. Great for wet rooms and family bathrooms alike, the cantilevered rails allow space for the plumpest of towels and the radiator can be installed with the rails to the right or left.

10

Arteplano

This radiator puts its best face forward, as the heating tubes are concealed behind a beautiful metal front plate. Choose a colour to pop or blend, or take home a true original in brass or copper – each model is individually etched so every radiator is unique.

24

Aluminium Blitz Super

Aluminium radiators give a fast response and comfortable heat with high thermal efficiency. Energy saving and easy to handle and resistant to corrosion, the Aluminium Blitz Super is a modern radiator in every sense.

14

Ax Spa

With its single or double tube options, the unique Ax Spa can meet all bathroom-heating requirements. It is also available as an oil-filled electric radiator. Smaller sizes ideal for fitting under bathroom windows, or within cloakrooms and en-suites.

28

Aluminium Garda S90

Space-saving, economical and efficient, the Aluminium Garda S90 radiator is fast to respond and easy to handle, plus it is also available with an optional towel bar making it suitable for living, kitchen and bathroom spaces.

16

Blok

The Blok radiator complements the clean lines of contemporary bathrooms and kitchens. Compact and with a good heat output, this energy efficient aluminium radiator is suitable for both large and small spaces.

32

Alura

The Alura is a fast response electric aluminum radiator with a high heat output despite its compact size. It's lightweight and easy to install, and the straightforward digital controls make it easy and economical to use.

18

Charleston

The Charleston multi-column, equally at home in modern and traditional settings, comes in an extensive assortment of stocked horizontal and vertical dimensions. There is also a dedicated range with welded-on feet, and can be Made to Measure, angled and curved.

36

Archibald

Move over Jeeves. This eye-catching towel radiator was the winner of the international Designboom competition in 2007, where the designer, Leo Salzedo, styled it as a tribute to the ultimate butler. Its sleek, sinuous form will ensure that your towels are served warm and dry.

20

Charleston Bar

The popular Charleston Bar multi-column with chrome towel bar combines warmth and practicality. Perfect for kitchens and bathrooms. Small sizes ideal for fitting within cloakrooms and en-suites.

48

Contents

Chime

This gleaming towel warmer is a great all-rounder. Made from stainless steel, the polished finish it is perfect for wet rooms, alternatively you can now order the Chime our special PVD finishes. With wide rung spacing also allows plenty of space for towels – great for family bathrooms. **50**

Metropolitan

The Metropolitan has a contemporary, minimalist appearance. Designed in Italy by the award-winning King & Miranda, the Metropolitan has beautiful clean lines creating a geometric shape. Smaller sizes ideal for fitting under bathroom windows. **68**

Deline

The classic design of the Deline is sure to suit any bathroom. With its hidden air vent and brackets mounted on the back of the towel rail it is both stylish and practical. **54**

Metropolitan Spa

The Metropolitan Spa towel radiator brings an elegant, spa-like style to any modern bathroom. Connections and air vents are neatly hidden to maintain purity of the design. Smaller sizes ideal for fitting within cloakrooms and en-suites. **72**

Deseo Verso

Stylish and practical, the innovative retractable bars of the Deseo Verso make it not only a towel warmer but a room radiator rolled into one. **58**

Ovida

What sets the Ovida apart from the rest is the upmarket tube-on-tube design. Stylish and practical, it has closely spaced tubes which not only make the proportions more elegant but also improve the output of the towel rail. **76**

Fare Tech

The Fare Tech electric radiator combines beauty and brains. Manufactured from aluminium, its unique, elegantly curved shape allows comfortable radiant heat to disperse optimally throughout the room. **60**

Pera

Less is definitely more with this chic stainless steel towel rail as the refined construction allows the tubes to meld gently into one another. The Pera brings a quiet elegance to both modern and traditional bathrooms. **80**

Klaro

The Klaro is an affordable style, suitable for central heating systems or for use with an immersion heater during summer when the central heating is turned off. Smaller sizes ideal for fitting within cloakrooms and en-suites. **62**

Quaro Spa

The Quaro Spa has an elegant square profile frame and horizontal heating pipes. Beautifully designed with clarity and simplicity, even the right-angled wall brackets are stylish. Smaller sizes ideal for fitting within cloakrooms and en-suites. **84**

Lissett

The sibling of our popular Svelte radiator, the Lissett radiator has the same graceful style but with a larger heat output and more space for towels, making it a great choice for family bathrooms. Made from recycled aluminium it's not only eco-friendly but it also heats up faster and more efficiently than traditional designs. **66**

Ribbon

The super sleek and stylish Ribbon towel radiator is suitable for modern bathroom interiors and available in a range of sizes, and in over 50 finishes including chrome, white and matt black. **88**

Roda

A simple, effective and efficient radiator, the Roda is perfect for all living areas, and is also available Made to Measure.

92

Svelte

The prima ballerina of radiators – slender, graceful and versatile – the Svelte looks equally at home in luxury spa bathrooms and contemporary kitchens.

120

Roda Mirror

With a full-length mirror to enhance its elegance, the Roda Mirror radiator is a stylish asset to any home.

98

Tetris

Creating a fusion between nature and architecture, the latest towel radiator design by renowned design studio King and Miranda exclusively for Zehnder, the Tetris is inspired by the flow of a river and the rhythm of flight.

122

Roda Spa

The Roda Spa combines practicality and contemporary design and a high heat output that will warm even the largest of bathrooms.

100

Yucca Asym

The Yucca Asym is a beautiful but practical towel rail. Available with single or double tubes in either white or chrome, the Yucca Asym can be installed perpendicular to the wall to create a partition.

126

Roda Spa Asym

The Roda Spa Asym is a highly functional and stylish towel rail with a practical asymmetrical design that allows towels to be hung easily. The central heating model is available with horizontal tubes facing either left or right.

104

Yucca Symm

The Yucca Symm is a palm-inspired radiator that blends style and functionality. Ideal for hanging towels and clothing, its symmetrical tube design offers easy access from both sides.

128

Stellar Spa

The Stellar Spa is contemporary in design with its stainless steel finish. Ideal for wetrooms and suitable for dual energy installation. Smaller sizes ideal for fitting under bathroom windows, or within cloakrooms and en-suites.

108

Subway

The Subway is a simple yet elegant towel rail. Stocked in either white, chrome and three other colours as standard. Smaller sizes ideal for fitting within cloakrooms and en-suites.

Temperature controller: Backlit LCD digital display screen gives complete control. Temperature can be adjusted in 0.5°C increments. 3 pre-set programmes and 5 mode settings. Open window detection system and parental lock. 7 day programmable function.

Open Window detection

The Integral control unit recognises if a window has been opened for an extended period and switches the radiator off. Once the window is closed, the radiator returns to normal operation.

- Temperature changes are quickly recognised via the external temperature sensor
- The integral thermostat proactively reacts to sensor information; delivering the perfect indoor climate
- Intuitive radiator which automatically switches off if a window is open for an extended period
- An intelligent heating solution which lowers costs and energy consumption

100mm x 80mm extruded sections
All dimensions in mm

The Alura is a fast response electric aluminium radiator with a high heat output despite its compact size. It is lightweight and easy to install, plus the straightforward digital controls make it easy and economical to use. H shaped mounting brackets with a removable spirit level and locking system are also included.

HZA056-100-9523 ETCHED COPPER

This radiator puts its best face forward, the heating tubes are concealed behind a beautiful metal front plate. Choose a colour to pop or blend, or take home a true original in brass or copper – each model is individually etched so every radiator is unique.

HZA056-140-9536 BRUSHED BLACK

For pipes from wall Zehnder recommends VALVE-SET-10 for horizontal models. It is available in a complementary brass or copper finish, see page 140.

Valve sets in colour finish are also available. For more information see pages 142-143

Bespoke Design

The Zehnder Arteplano is also available as a Made to Measure option, allowing unique sizes to be created.

To make the Zehnder Blok a towel radiator please add a single BLARS-033 or BLAR-033 to orders. See page 32 for details.
Please note: Additional towel rails (3 max) can be added to the 160 & 190 models. Please ensure a minimum of 315mm vertical spacing between each rail.

Technical Information

Please note: We only supply complete radiators. Additional sections cannot be joined to our stock range of radiators. The number of sections/width is virtually unlimited. Practicality regarding weights, handling and accessibility should be taken into consideration. Large radiators may be supplied in modules to be assembled on site. Lead times – After the designs have been confirmed, please allow 6-8 weeks for curved, angled and engineered to order.

Radiators are supplied with bottom opposite end connections as standard. For underside connections, please specify at the time of ordering.

Angled radiators: Prices on application. Please contact your Zehnder stockist or a member of our sales team for further details.

Curved radiators: Please multiply the prices for standard radiators by 2.

All data and prices per 46mm section

Formulas: Nominal overall radiator width = (No. of sections x 46mm) + 26mm

No. of sections = (Nominal overall radiator width (mm) - 26mm) divided by 46

(Manufacturing tolerance of +/- 1.5% in width, +/- 2mm in height, +/- 5mm in depth)

*1/2" air vent
Width excludes air vent
F = flow
R = return
H = height
W = width
Tube: Vertical Ø 25mm
All dimensions in mm

The classic Charleston is one of our most versatile radiators. The vertical sizes are perfect for any living space areas including stairs, alcoves and by French windows.

The Zehnder Charleston multi-column can be Made to Measure, with bespoke heights, widths, depths, connections and colours.

If you're looking for something more specific, get in touch to explore our Engineered to Order options.

CHZ-100-50 STAINLESS STEEL MIRROR

This gleaming towel rail hits all the right notes. Made from highly polished stainless steel, allowing for towels to be easily slid on and off.

The rail can be installed with the horizontal tubes to the right or left.

Valve sets in colour finish are also available.
For more information see pages 142-143

For PVD finishes
Zehnder recommends
VALVE SET-35.
For more information
see page 139.

For pipes from the wall
Zehnder recommends
VALVE-SET-27 for
more information see
page 139.

Supplementary Heater
Connection for dual fuel.
Electric immersion heater
(IHE) & VALVE-SET-19.
See pages 136 & 139
for more information.

It's the considered details which make the Deline stand out from the crowd – discreet brackets, hidden air vents and a stock range of seven fabulous finishes which compliment popular bathroom surfaces.

Discreet air vent located on the back of the radiator.

For models in volcanic and matt black finish, manual valve sets 26, 27 & 28 are now available in a complementary finish.

Zehnder recommends VALVE-SET-28. For more information see page 139.

Valve sets in colour finish are also available. For more information see pages 142-143

Temperature controller: Backlit LCD digital display screen gives complete control. Temperature can be adjusted in 0.5°C increments. 3 pre-set programmes and 5 mode settings. Open window detection system and parental lock. 7 day programmable function.

Colour finish: Colours from the World of Colours chart are priced at: Traffic White (RAL 9016) + 25%.
Colour finish and non-stock products delivery: 3-5 weeks.

Open Window detection

The Integral control unit recognises if a window has been opened for an extended period and switches the radiator off. Once the window is closed, the radiator returns to normal operation.

- Temperature changes are quickly recognised via the external temperature sensor
- The integral thermostat proactively reacts to sensor information; delivering the perfect indoor climate
- Intuitive radiator which automatically switches off if a window is open for an extended period
- An intelligent heating solution which lowers costs and energy consumption

80mm x 100mm extruded sections
All dimensions in mm

Stocked items

The Fare Tech is an electric radiator which combines beauty and brains. Manufactured from aluminium, its unique, elegantly curved shape allows comfortable radiant heat to disperse optimally throughout the room, whilst its smart integrated control panel allows the room temperature to be easily set and energy consumption controlled.

LRS-040	Zehnder Lissett Towel Rail for cloakroom. Length spans 2 elements (adds 45mm to front face)	Polished Aluminium	£207	£248.40
LR-040	Zehnder Lissett Towel Rail. Length spans 2 elements (adds 65mm to front face)	Polished Aluminium	£210	£252.00

Stocked items

The older sibling of our popular Svelte, the Lissett has the same graceful style but with a larger heat output and more space for towels, making it a great choice for family bathrooms. The rail is made from highly polished aluminium and allows plenty of space for sumptuous towels.

Also available in smaller sizes, ideal for cloakrooms and ensuites

To make the Zehnder Lissett a towel radiator please add a single LRS-040 or LR-040 to orders.

LI-160-040 TRAFFIC WHITE 9016 with optional towel rail LR-040

For pipes from the floor Zehnder recommends VALVE-SET-36.

For pipes from the wall Zehnder recommends VALVE-SET-11.

The Metropolitan Spa towel radiator brings an elegant, spa-like style to any modern bathroom. Connections and air vents are neatly hidden to maintain the formality and purity of the design. Geometric cut-outs create an attractive shape with plenty of space for towels to dry. Also available as a room radiator.

*Traffic White (RAL 9016)

Dual energy: Self fit (additional cost to central heating model prices). For more information please scan the QR code.

Colour finish: Colours from the World of Colours chart are priced at: Traffic White (RAL 9016) + 25%.
Colour finish and non-stock products delivery: 3-5 weeks.

Tube frame: 30mm x 30mm square
 Tube horizontal: 25mm x 25mm square
 All dimensions in mm

Stocked items

The Quaro Spa has an elegant square profile frame and horizontal heating pipes. Beautifully designed with clarity and simplicity, even the right-angled wall brackets are stylish. Generously spaced tubes give plenty of room for warming fluffy towels.

Where space is restricted the Zehnder Quaro Spa is available with a room divider bracket option.

To order this version please stipulate on your purchase order at the time of ordering.

*Additional price:
White finish: £61
Colour finish: £76*

For pipes from the wall Zehnder recommends VALVE-SET-11. For more information see page 140.

Valve sets in colour finish are also available. For more information see pages 142-143

Open Window detection

The Integral control unit recognises if a window has been opened for an extended period and switches the radiator off. Once the window is closed, the radiator returns to normal operation.

- Temperature changes are quickly recognised via the external temperature sensor
- The integral thermostat proactively reacts to sensor information; delivering the perfect indoor climate
- Intuitive radiator which automatically switches off if a window is open for an extended period
- An intelligent heating solution which lowers costs and energy consumption

Ventilation

The rhythm of warmth – creating a fusion between nature and architecture, the latest towel radiator design by renowned design studio King & Miranda exclusively for Zehnder, the Tetris is inspired by the flow of a river and the rhythm of flight.

This philosophy translates into a product which balances its proportions and has space to breathe. The clean lines are accentuated by precision manufacturing techniques, creating an almost seamless construction.

Valve sets in colour finish are also available. For more information see pages 142-143

YS-180-050 BLUE NIGHT 0289

Bespoke radiators

Whether manufactured to a special size, angled or curved, our bespoke radiator designs allow for a truly customised heating solution.

Look out for products with our Made to Measure symbol to perfectly match your required space or heat output

ZEHNDER EXCELSIOR

Made to Measure

Zehnder radiators are very much part of the interior design planning process. They can set the scene for a room design, adding to the ambience, and becoming a central aesthetic element of the interior decor.

To add the perfect radiator to your home

- Select the height, width and depth you need to fit the space perfectly and to achieve your desired heat output
- Choose the colour, finish and valves to match your interior
- Add your accessories including towel bars and hooks, making your radiator functional as well as stylish

ZEHNDER CHARLESTON

Engineered to Order

Any size, any space. The Zehnder Engineered to Order (ETO) range enhances even the most awkward of spaces, offering unlimited options and countless opportunities.

- Pick your space where you would like your radiator to go e.g. lofts, stairways, bay windows, around pillars
- Contact your local Zehnder showroom to discuss your options
- Agree shapes style and colour of your radiator for this to be designed manufactured and installed into your home

ZEHNDER CHARLESTON

Applications

Room divider

The **Zehnder Subway** radiator can provide efficient heating and a striking visual element to your home by acting as a transparent divider between kitchen and living areas.

Trapezoidal

The **Zehnder Excelsior** is able to be custom made to follow the contours of your staircase perfectly, making it a stunning feature that is both practical and elegant.

Visit our website to learn more about the Zehnder Excelsior

Angled

The **Zehnder Roda** radiator is expertly crafted to fit perfectly into the corners of any room, effortlessly blending into the overall design scheme while providing exceptional heating performance.

Curved

The **Zehnder Charleston** can be uniquely designed to adapt to the dynamic architecture of any room, providing efficient heating without compromising on style or functionality.

Ventilation

Low-water temperature radiators

Achieve a new level of efficiency

With the reduction in operating system temperatures, especially in conjunction with heat pumps, the need for radiators that offer good output with lower flow temperatures is growing in significance.

All our radiators are suitable for low-water temperature systems, but the Zehnder Charleston and Zehnder Excelsior, with their Made to Measure options, are able to provide a multitude of configuration options which make them exceptionally compatible with heat pumps.

Regarding heaters for bathrooms or kitchens, the double-layered Zehnder Ovida and Zehnder Yucca models are ideal. These models not only maintain the aesthetic appeal of a 'ladder rail' look but also ensure effective heat output at lower system temperatures.

- Energy-efficient
- Powerful
- Fast response
- Perfectly matched to the heating system
- Available from our stock range or custom-made
- In a range of models and surface finishes

Get in touch to learn which radiators would be best suited to your system.

Dual energy & electric radiators

Zehnder's electric heating system offers the flexibility to operate solely on electricity or in combination with the central heating system for dual energy operation, ensuring optimal heating all year round.

A comprehensive range of Zehnder bathroom radiators are available as electric radiators, including the stylish Zehnder Ribbon, and existing central heating models can be easily retrofitted with an electric heating element.

With Zehnder's electric radiators graded by both price and comfort classes, you can choose the perfect heating solution to meet your needs.

Here, you can explore our full range of electric and dual energy radiators

Electric Immersion Heaters

State-of-the-art technology

- Simple and thermostatic options
- Simple immersion with patented design offering greater efficiency and longer lifespan (IHE)
- Simple immersion IP65 rated (IHE)
- Thermostatic element has 5 water temperature settings (CTE)
- T-Piece in colour finish available

Sustainable and easy to integrate

The Zehnder Immersion Heater Easy (IHE)

The Immersion Heater Easy (IHE) is an integrated option for smart home systems with on-site control. The new technical Zehnder patented solution reduces output in the upper temperature range to 50%, limiting temperature fluctuations and saving energy. This also extends the immersion heater's service life, making it more sustainable.

The IHE is factory-fitted directly into the following electric radiators:

- Zehnder Deline Electric
- Zehnder Klaro Electric
- Zehnder Ovida Electric
- Zehnder Ovida Bow Electric
- Zehnder Subway Electric
- Zehnder Tetris Electric

Visit our
website

Manual valves

Manual valves offer straightforward control of your radiator, functioning simply as an on/off control. This allows for direct operation of your heating system. The key benefits to manual valves are that they're reliable, easy to use, and discreet in appearance.

Thermostatic valves

Thermostatic Radiator Valves (TRVs) offer a sophisticated mechanism for regulating room temperature. They automatically adjust the heat by closing off the radiator when the room reaches the set temperature, reopening when the temperature drops. This provides an energy-efficient solution for maintaining a comfortable room temperature.

Please note: Thermostatic valves must be fitted to the flow side, as they are not bi-directional.

In stock items highlighted in bold

	Thermostatic double angled valve set left-handed		RRP (exc VAT)	RRP (inc 20% VAT)	Centre of valve to point of connection: 44mm

You are what you Heat

The Manufacturers Association of Radiators and Convectors (MARC) is committed to product satisfaction and consumer assurance. As members, Zehnder pledges to raise standards and compliance through a series of initiatives. The first of these initiatives is a targeted consumer campaign.

Launched in July 2020, the 'You are what you Heat' campaign explains the importance of having CE markings on all radiators. This helps ensure that heating systems and homes are fit and healthy, and that consumers are receiving high-quality products that have been fully tested and approved.

What will happen if I end up with a radiator that is “under sized” due to incorrectly published outputs?

- It will not adequately heat the space it was purchased to heat
- In order for you to be warm enough, it will be necessary to run the boiler at higher temperatures than would have been necessary
- You will burn more fuel and in turn create more CO2 emissions
- Burning more fuel will increase your heating costs
- This may affect the life cycle of the boiler or heat source

By purchasing a Zehnder radiator you do not have to worry about any of the above. All of our radiators are independently tested and conform to the highest of standards. As proud members of MARC, Zehnder have and will continue to play an integral part in delivering high-quality heating products with true heat outputs.

To find out more visit: <https://www.zehnder.co.uk/en/decorative-radiators/accreditations-compliance>

Affiliated companies

Zehnder are proud to be members of The Manufacturer's Association of Radiators and Convectors, an organisation established to focus on creating & maintaining the highest industry practices and standards.

Zehnder products are listed within the TruBlue software, an advanced platform which helps showrooms manage and process orders.

Zehnder products are included in the Virtual Worlds design software meaning you can see how your radiator will look in your bathroom before it is installed.

Zehnder products are available in the EQ software package, making it easy for showrooms to add these to an overall bathroom order.

Eco Design Regulations for electric heating

Since 1st January 2018, all electric local space heaters manufactured for sale in the EU must comply with a minimum efficiency standard under Lot 20 of the Energy Efficiency Directive. This was one of the biggest changes the electric heating industry has experienced in decades.

RICHTLINE (UE) 2015/1188

Zehnder products that fall within the scope of the Eco Design Directive offer high quality performance with efficient controls to help reduce unnecessary energy wastage and running costs including;

- Low energy consumption when on stand-by (<0.5 watts)
- Programmable operation (weekly)
- Open window detection

Accreditations correct at date of print October 2024

Ventilation

Zehnder Low Energy Continuous Fan Ø100mm

Stocked items

Continuous ventilation ensures a continually fresh environment with a constant low level trickle. The automated boost fan mode will come on if there is a high level of moisture in the room.

This low-noise, low-energy design costs as little as £2.15 to run for the entire year. It operates discreetly in the background, ensuring mould and condensation are kept at bay. SMART humidity and timer controls eliminate nuisance noise and running, leaving you to relax in the serenity of your bathroom.

100% adjustable speed

Ceiling Application (unit can be wall or ceiling mounted)

Tile Vent termination (min 7500mm² equivalent area)

Condensate drain (to nearest waste water connection)

ZCV2 Controls

	ZGG42BA	100mm External grille with spigot in brown		£5	£6.00

Zehnder Adaptive fan with "SMART" timer technology.

The length of time of the fan over-run is based on occupancy duration, up to a maximum run-time of 15 minutes, reducing heat loss and energy usage.

Zehnder Adaptive fan with "SMART" humidistat and timer technology.

The fan knows the normal humidity level and only activates when spikes occur, providing the right amount of ventilation when required, unlike fans with a generic point that respond to high ambient humidity on a summer's day and particularly in the middle of the night.

Zehnder Silent Wall & Ceiling Fans

In stock items highlighted in black	Description	Controls	Airflow l/s in FREE AIR (BS848 Pt 1)	Sound pressure level @ 3m dB(A)	Energy consumption (W)	IP Rating	RRP (ex VAT)	RRP (inc 20% VAT)

Kit includes 125mm induct fan, internal grille with low voltage 12V light and transformer, 90° bend, 3 metres of flexiduct, 4 fixing clips, ceiling grill and fixing screws. White & Chrome bezels provided.	56	31	Fan 20W, 12V lamp rated at 6W	IPX4 Zones 1 & 2	£169	£202.80

Length of ductwork should not exceed the length of the ducting supplied. Recommended for discharge through an external wall or soffit, **but not** the roof.

Soffit installation

Silent Fans are 70% quieter than standard axial fans when operating. Supplied as shower kits with or without an LED light in “warm white” (2700K).

ZSR100ETSKA

Today’s luxurious showers and bathrooms call for high performance and high-quality design. The Halo is a ceiling extractor fan supplied as a kit with an integrated LED light in “warm white” (2700K).

ZHC115ETSKA

Colours and special finishes

Most of our radiators come in 2-3 stocked finishes, complementing various interiors, with a range of other options to order. The following pages display our popular colours and finishes. To see which radiators are available in specific finishes, consult the following page's colour system tables. If your desired finish isn't displayed, we can arrange certain models to be painted in a wide range of RAL or NCS colours (price on application), provided the colours column in the tables has a ♦.

Metal Surfaces and Charleston Finishes

A number of our radiators are available in Chrome and Brushed Stainless steel as standard finishes. We also have a variety of exclusive surfaces which are only available for our Zehnder Charleston range. Get in touch with us or speak to your local showroom if you'd like more details on these finishes.

* due to the manufacturing process, these finishes are unique to each individual radiator.

Colour matching service

We offer a unique colour matching service which allows you to match your radiators to popular paint ranges such as Farrow & Ball, Little Greene and Dulux. We can also match to other items such as wallpapers and kitchen cabinets.

All we require is a sample of the colour you want and we can then advise the closest match. There will be a small charge (< £10) to organise each proof, to ensure that you receive the precise colour.

Please note: As with all colour matching services, every colour is unique, meaning prices are only available on application. Colour matching is only available on products that are marked with a ◆ in the colour matching column above.

Contact a member of our team for prices and lead times on our colour matching service.

World of Colours

The World of Colours brings you the latest on-trend colours and finishes to elevate your decorative radiator, while also offering popular and timeless classics.

Comprised of five colour worlds, divided into warm and cool colours, Zehnder worked closely with leading interiors and colour experts to curate this trend-driven colour palette. The World of Colours is designed to help you match your radiator to your personal style and complement your home décor perfectly.

Choose from a wide range of finishes, including vibrant, bold colours and subtle, calming tones.

The Sanctuary

The home as a place of rest, relaxation and retreat

The home is a place of relaxation and tranquillity. Rough surfaces, brushed finishes, mixed glazes and natural materials create sanctuaries. Natural off-white, light brown and grey tones are the key to a cosy environment to relax in. Brushed metals such as brass mixed with wood create a modern contrast. Round shapes and soft textures soften any feeling of austerity.

The Mystical Home

A private place for personal rituals and wellness

Rough, natural surfaces contrast with refined designs. Rough concrete textures mixed with polished stone surfaces create a multi-sensory experience. Black and dark grey shades, graphite and taupe are the key to a mystical home. The monochrome rooms are accentuated by dark blue tones and brushed metal. The muted colour palette is made for a tranquil space for personal rituals and wellness.

Mother Earth

Terracotta as a symbol for a warm and earthy look

Terracotta helps to create an earthy and warm look, both as a material and as a colour. The highly pigmented quality of terracotta and the deeply saturated but sun-faded solid colours create a natural and sophisticated look. Shades like cotton white, ochre, brick red and brown are combined to create an earthy colour palette. Terracotta is symbolic of the earth we live on and our strong desire to protect it.

Mono Material Concrete

The continuity of space – raw, seamless, expressive

The use of a single material creates a seamless, uniform look and a quiet space – free from visual noise. Raw concrete flows from the interior to the exterior, giving continuity to the space. Eccentric orange and natural brown tones create a modern contrast. Home accessories in brushed metal are ideally combined.

Neo Green

Reflections on our desire for a natural environment

Green tones create a balance with our desire for more nature in our lives. Walls and floors, but also textiles and décor appear in shades of green. Soft, delicate mint or petrol-coloured graphite reflect our desire for a natural environment. Nude, light brown and grey tones create harmony and calm.

The full World of Colours chart can be found at the back of this brochure

World of Colours

FAQ

Choosing and ordering a product in one or more of these exciting colours couldn't be easier.

How do I select a gloss or matt finish for my radiator?

All gloss finishes are indicated in this colour chart with both the wording 'Gloss' and a diamond  icon.

For example, if you choose to place an order in the finish Jet Black, this has a gloss finish as shown below. When ordering this finish please use the colour code 9005.

Jet Black
9005 Gloss

All matt finishes are indicated in this colour chart with the wording 'Matt'. These finishes do not have the diamond icon.

For example, if you choose to place an order in the finish Reseda Green, this has a matt finish as shown below. When ordering this finish please use the colour code 6211.

Reseda Green
6211 Matt

Can I order a product in gloss if it doesn't have the diamond symbol?

Yes, this is possible in most cases. Please contact our customer service team to discuss which finishes can be produced. If this is possible then the surcharge will be the same as the matt version. You will also need to highlight the request for gloss when placing your order.

Can I order a radiator in matt if it has the diamond symbol?

Yes, this is possible in most cases. Please contact our customer service team to discuss which finishes can be produced. If this is possible then the surcharge will be the same as the gloss version. You will also need to highlight the request for matt when placing your order.

Are there additional costs for colours from this colour chart?

All colours in this colour chart incur a 25% surcharge on the standard Traffic White (RAL 9016) finish price.

Can I have radiator made in a colour that is not in this colour chart?

Colours (in the RAL and NCS colour ranges) and/or finishes which are not included in the World of Colours chart incur a RRP surcharge (in addition to the coloured price) of £330 (excluding VAT) per radiator. Please see page 201 for details on our colour matching service.

Manufacturing the Multi-column

The Zehnder Charleston radiator has played a key part in the company's success for nearly 100 years. Continuous advances in the quality of production methods and technology has kept the Charleston multi-column at the forefront of the radiator market.

Expertly Crafted

In the first stage of production, high-quality steel is precisely engineered into coils and tubes, setting the foundation for our radiators. These materials undergo meticulous shaping, welding, and rigorous quality checks, ensuring each radiator is flawlessly assembled and pressure-tested for ultimate reliability and performance.

Zehnder Charleston LaZer made

The fact that Zehnder Charleston has become a radiator classic is down in no small part to its innovative strength. And even today it boasts a unique feature: the manufacturing of Zehnder Charleston with LaZer made. This innovative laser welding method for the production of sectional radiators is setting new standards in terms of precision, quality and functionality.

Learn more

Zehnder Charleston in Technoline

Zehnder Charleston in Technoline adds a touch of industrial flair to your space with its raw and authentic finish. This distinctive style embraces the manufacturing marks, inconsistencies and irregularities that occur during the production process, making each radiator a unique piece. The resultant variations in tone and pattern depend on the dimensions of the radiator and the techniques used during fabrication.

When considering the Zehnder Charleston in Technoline, it is helpful to note that models in Technoline equal to or over 400mm in height (excluding feet) typically presents a uniform, light top. The Zehnder Charleston models in Technoline which are under 400mm in height (excluding feet) bear darker welding marks near the top and bottom, accentuating their industrial character.

Whilst this should help to give a guide to some of the varieties of the finish, we would advise that other differences could occur and that the beauty of this product is in its unique, industrial appearance.

Please note: the finish is not suitable for bathrooms.

Join our Design Community

Design stunning spaces

At Zehnder, we believe that radiators should embrace function and style – creating a design statement in your interior. Apart from our comprehensive range of colours and finishes, many products can be bespoke to suit the installation including angled and curved designs to ensure that you can find a radiator to perfectly match and enhance your décor.

Inspiring designs for every interior

Find design inspiration through our digital mood boards - showcasing a variety of styles and ideas, download carefully curated assets to inspire and enhance your projects, ensuring a perfect blend of form and function.

General Information

Heat Loss Calculator

This easy-to-use heat calculator can work out the heat requirements for your room.

Stage 1 Take the room dimensions in metres

Width m Length m Height m

calculate the volume ($W \times L \times H$) = cubic metres

Stage 2 Heating requirements per room type

Living Room / Dining Room / Bathroom volume

multiply volume as calculated in Stage 1 by 50 = Watts required

Bedroom volume

multiply volume as calculated in Stage 1 by 40 = Watts required

Kitchen / Hallway volume

multiply volume as calculated in Stage 1 by 30 = Watts required

Stage 3 Other factors for consideration

Is the property exposed? a

Does the room have large areas of glazing? b

Are the windows double glazed? c

If factor 'a' applies, increase the Watts required at Stage 2 by 15%

If factor 'b' applies, increase the Watts required at Stage 2 by 20%

If factor 'c' applies, decrease the Watts required at Stage 2 by 10%

If factor 'a' and 'b' apply, increase the Watts required at Stage 2 by 35%

If factor 'a' and 'c' apply, increase the Watts required at Stage 2 by 5%

If factor 'b' and 'c' apply, increase the Watts required at Stage 2 by 10%

If factor 'a', 'b' and 'c' apply, increase the Watts required at Stage 2 by 25%

Please note that this calculator is provided as a guide only.

To convert Watts to BTUs, multiply by 3.412.

For an approximate conversion from $\Delta T50^{\circ}\text{C}$ to $\Delta T60^{\circ}\text{C}$, multiply the $\Delta T50^{\circ}\text{C}$ output by 1.2.

Terms and Conditions of Trading

A complete copy of the company's terms and conditions of trading are available on our website www.zehnder.co.uk

In addition to the Terms and Conditions, please note the following:

- All delivery times quoted are estimates only. Prices quoted include free delivery to the UK mainland. Any orders with a net value less than £50 net will be subject to a processing and delivery fee of £10 +VAT.
- Returned goods for credit will only be accepted by prior arrangement (confirmed in writing), within 8 weeks of the date of despatch, where the goods are part of our stock range and where the goods are as fit for sale on their return as they were on delivery. If goods have been fitted this is deemed as acceptance of their quality. We cannot accept the return of non-stock goods.
- Damaged products are to be reported to us within 3 days of delivery. Zehnder cannot be held responsible for any damage after onward delivery. Faulty products are to be reported to us as soon as possible. If the items have been installed, you are in acceptance of its condition and Zehnder reserve the right to refuse credit.
- You are responsible for ensuring the suitability, conformity and interoperability of the goods or indicative system design suggestions provided by us with your heating system and your design requirements. It is important that you undertake such verification with an appropriately qualified expert third party.
- Where a radiator is returned as no longer required and an alternative radiator is not ordered a restocking fee of 25% of the price of the returned good will be charged (unless the goods were defective when delivered). If a radiator is no longer required but an alternative radiator is ordered, either a restocking fee of £40 or 25% of the value (whichever is the lower) will be charged.
- We warrant steel radiators for a period of 5 years with the exception of Charleston, which is extended to 10 years for products purchased from the 1st October 2024. Stainless steel and aluminium radiators also carry a warranty of 10 years, with the exception of Svelte, Blok and Lissett which remain at 5 years. The warranty is 2 years for electrical componentry and 3 years for extractor fans, from the date of delivery. The warranty is subject to correct installation to prevailing standards /water treatments and use.
- Radiators with steel components (other than stainless steel) must not be installed on a domestic hot water circuit. If a stainless steel or brass product is to be installed on the domestic hot water circuit, a check should be made with the local water authority to ensure that dezincification is not a common occurrence.
- Artificially softened water should not be used to fill radiators. For FAQ radiator/water-related information, visit www.fernox.com.
- All measurements given in this brochure are nominal dimensions only.
- All brochures, catalogues and other promotional materials are to be treated as illustrative only. Their contents form no part of any contract between us and you should not rely on them in entering into any contract with us. Any typographical, clerical or other error or omission in any literature, quotation, price list, or other document issued by us will be subject to correction without liability being incurred by us.
- Orders for non-stock items such as made to measure and made to order (as identified as such in our brochure for Zehnder which was in circulation at the date you placed the relevant order) which we have accepted cannot be varied and/or cancelled once manufacturing has begun or special material and/or equipment has been ordered by us. Any variation with the order has to be communicated within 24 hours of the order acceptance.
- All VAT calculated at 20%

Bathroom Zones

The diagram below shows a bathroom divided into four clear zones: 0, 1, 2 and outside zones. Please note, the diagram is only a guide and is NOT to scale. Please refer to I.E.E Wiring Regulations (BS 7671:2008) for detailed information.

Zone 0: Inside the bath

Zone 1: Area above bath / shower tray to a height of 2.25m.

Minimum rating of IPX4 should be used unless water spray will be present. In this case, a rating of IPX5 should be used.

Zone 2: Area stretching 0.6m from zone 1. Minimum rating of IPX4 should be used here.

Outside Zones: No water spray is likely to be used here, therefore, no IP rating is required.

IP Rating: "X" denotes level security against dust particles. Second digit denotes level of "watertightness".

IPX5: Protected against low pressure water jets

IPX4: Protected against splashing water

Frequently Asked Questions

Why is it important with some of the models that the flow is in a specific connection position?

Some of the design radiators have baffles inside the water-carrying tubes to divert the water flow around the whole radiator to maximize efficiency. Check the installation instructions to see if this applies to the radiator before it is installed.

What is an inhibitor and why should it be used in a central heating system?

An inhibitor is a chemical mix that should be added to the central heating system water to prevent corrosion and to prolong the life of the system. When new or additional radiators are being installed, the system should be drained, cleaned and flushed in accordance with BS7593 and a good quality chemical water treatment inhibitor should be added to the heating system.

Can steel and aluminium radiators be put on the same system?

Yes, as long as an inhibitor for mixed metal systems is used. In reality, most systems are already mixed metal, as many have aluminium heat exchangers in the boiler, plus copper pipes and steel radiators already installed.

Why is it important to use dual energy installations correctly?

Simultaneous use of the electrical element and the central heating system should be avoided as this will shorten the life of the element and invalidate the warranty. Correct use is as follows: In summer when the central heating is switched off, vent the radiator to ensure there is no air present, then close the flow valve (only) and activate the immersion heater. In winter, de-activate the immersion heater and open the flow valve.

What is the difference between outputs listed at $\Delta T60^{\circ}\text{C}$ and $\Delta T50^{\circ}\text{C}$?

$\Delta T60^{\circ}\text{C}$ allows for older boiler systems, whilst $\Delta T50^{\circ}\text{C}$ is the new European testing standard for modern boilers, such as condensing boilers, which have lower flow and return temperatures. Therefore, to avoid radiators being incorrectly sized, it is important to know the system's temperatures and take them into consideration.

Making history. Shaping the future.

Since 1895

1895

Repairs of all kinds

The Zehnder family of entrepreneurs begins with Jakob Zehnder (born in 1855). He builds a house and small mechanical workshop in Gränichen, Switzerland.

1923

A light motorcycle conquers Switzerland

The Zehnder brothers develop and sell the legendary "Zehnderli" light motorcycle.

1964

Start of global expansion

In view of growing competition in Germany, the Zehnder company decides to open its own dedicated production plant near Freiburg in Breisgau.

1980

Entry into radiant ceiling panel market

Zehnder expands its portfolio to include radiant ceiling panels, which are ideal for heating industrial halls and commercial buildings.

1996

First production site in China

Zehnder becomes the first foreign company to enter the Chinese radiator market.

2007

Industry in its sights

Zehnder establishes a fourth business field with air cleaning systems for industry, logistics and the food and beverage sectors.

2018

Zehnder Specification Centre opens

Located in the Business Design Centre in Angel, Islington, the centre showcases Zehnder's range of indoor climate solutions including radiant heating and cooling products, comfort ventilation systems and radiators.

1912

The family-run company is born

The J. Zehnder & Söhne company is founded by Jakob Zehnder and his three sons.

1930

Europe's first steel tube radiator

The innovative Zehnder Charleston radiator, a design classic, establishes its place on the market.

1979

A leading European innovator

Zehnder demonstrates its pioneering spirit once again by developing the first bathroom radiator – a product that remains popular to this day.

1986

Listing on the Swiss stock market

Zehnder goes public and lists its shares on the Zurich stock exchange. The family retains a majority share to this day.

2001

Move into the ventilation business

Zehnder joins the comfort ventilation business, an area that undergoes regular expansion in subsequent years.

2013

Opening of the logistics centre

Opening the Zehnder logistics centre in Lahr, Germany, provides a hub for European deliveries and is a huge step forward in developing the company's customer service activities.

Today

A service provider and pioneer

Zehnder is a leading global provider of comprehensive solutions designed to ensure a comfortable and healthy indoor climate, with a workforce of around 3500 employees.
