Everything you Need to Design your Bathroom Space

# Beyond Space

With the start and end of every day comes the soft trickle of a shower, the scent of your favourite shampoo and the quiet exhale of a home. Through simple rituals of self-care, the bathroom becomes a place to pause, even if just for a moment.

Designing a bathroom is far more than just filling space. It's an expression that breathes life into a home, with the right details transforming what was once purely practical into a retreat where you can recharge, restore balance and reconnect with yourself.

Within this edition of Everything in Bathrooms, we explore how design, colour, functionality and sustainable solutions shape the way we live. From the timeless balance of black and white to the energising power of colour, from faucet finishes that make a statement to furniture designed to adapt, this edition celebrates bathrooms that evolve, just as we do. Beyond the bathroom, this edition also features Roca Aquafy, a sustainable system that brings the same design thinking to the kitchen, allowing you to enjoy filtered water directly from your faucet.

Discover new ways to create spaces that inspire and reflect your personal style in every surface, finish and material.

# The Timelessness of Black and White

**Designed for Daily Rituals.**

# Black or white, Meridian adapts seamlessly, blending light, shadow and clean lin

Simplicity is often the most powerful form of expression in design, some spaces invite stillness while others provide clarity. A bathroom designed with intention can do both. The Meridian collection in black and white proves exactly that. Dancing between light and shadow, its clean lines, refined proportions and effortless confidence create a space that frames the start and end of every day. Each tone expresses its own character. White reflects light, opening up the room with a sense of freshness. Black draws it in, grounding the space, adding definition and encouraging a slower rhythm. Used individually or in contrast, both finishes offer a timeless foundation for daily rituals that set the tone for everything that follows.

## Made to Fit In

One of the many qualities that make Meridian stand out is its adaptability. Big space? Great! Compact layout? No problem. Every element in the collection is thoughtfully balanced and engineered to fit flawlessly, no matter the setting. The furniture comes in both wall-hung and floor-standing formats. Wall-mounted units keep the room feeling open and by optimising space, while floorstanding versions offer a more grounded look and can be combined with drawers or open boxes for added storage and personality. The finishes are just as versatile. Matt white brings softness, especially when paired with natural woods like alder or birch, while glossy white adds even more brightness. Matt black creates a stronger presence, especially when combined with darker tones such as ebony. Whether the design is simple or more layered, the collection adapts effortlessly to the character of the room.

## Light and Airy

White makes everything around it shine. It lifts the space, clearing the visual noise and letting the room breathe. In gloss, it bounces light gracefully along its surface. In matt, it stays cool and grounded, adding calm without going flat. It's all about how you mix it. Pair it with pale woods like alder or birch, and you get that warm, effortless vibe. Throw in some brushed metal or clean-lined tiles, and suddenly you've got something a bit sleeker. And because Meridian includes slim basins and wall-hung toilets, this colour choice helps smaller spaces do more with less.

## Bold and Defined

Where white steps back, black steps in. It draws attention to shapes, edges and materials without taking over. The matt finish adds depth, softening the surface and giving it a slightly tactile feel. Black works especially well when layered with texture: dark wood for richness, metal for contrast and soft textiles to smooth out the edges. It holds its own in brighter spaces but also adds a cosy, cocooning quality in rooms with lower light, combining design with easy maintenance. Black keeps its sleek appearance, helping to conceal water spots and dust, so it stays effortlessly clean with minimal upkeep. Used on a few key pieces or throughout the whole room, black brings structure, clarity and a calm, confident energy that can take your bathroom from basic to bold.

## The Perfect Fit

Meridian is built to work as a whole collection. Basins, toilets and furniture are designed to fit together naturally while creating a space that feels cohesive and balanced. Basins are made from Roca's Fineceramic®, a strong, lightweight material creating smooth edges and minimal shapes. The collection comes in multiple sizes, from compact 550 mm options ideal for small bathrooms to generous 1200 mm double-basin formats. There are also several options to choose from, including over countertop, wall-hung and asymmetric designs with extra surface space, so there's a solution for every creative vision.

The same applies to the toilets and bidets. Whether wall-hung, floorstanding or close-coupled, each model adapts to different layouts while keeping the same modern look. All models feature Roca's Rimless® Vortex flushing system, which is efficient, quiet and easy to clean. Dual flush technology comes built in, helping reduce water use without sacrificing performance. The furniture ties it all together. Soft-close drawers, water-resistant finishes and optional organisers ranging in sizes from compact 200 mm metal boxes to spacious 800 mm drawer units come as standard, giving each piece a solid, smooth feel.

p.92  
Meridian basin, p. 63  
Ona faucet, p.131

## Complete the Look

Small details make a big difference. When it comes to keeping a bathroom organised, every piece plays a significant role. The Allegro and Hotels Round collections keep daily essentials neatly organised. Both feature wall-mounted pieces like towel rails, robe hooks, soap dispensers and toothbrush holders, freeing up counter space, cutting down clutter and making your daily routine a breeze.

Allegro goes softer and rounder, available in black or white. It's a perfect match for monochrome bathrooms, whether layered tone-on-tone or used for contrast. Hotels Round takes a sharper line. Its cylindrical shapes come in chrome or black, bringing a more minimal, architectural feel. Chrome adds a bit of shine, while black blends right in. To complete the look, Meridian can be paired with Roca's faucets in matching finishes, including standout styles such as Targa, Cala, Nu and Ona, as well as the matt black and matt white options from the Kay collection. Every finish is made to last, because complementary products should be just as reliable as everything else in your space.

## Black, White and Everything in Between

Meridian proves that a bathroom doesn't need to shout to make a statement. With just two finishes, black and white, you can cover a whole lot of ground: it all depends on how you put it together. The collection comes together like a puzzle. Basins, toilets, furniture and additional elements all blend naturally with one another, whether the space is big, small or somewhere in between. Formats are flexible, finishes are well thought out, and the details, such as soft-close drawers, minimal faucets and delicate edges, just make life easier. At the end of the day, it's about balance. Clean shapes, clear choices and a palette that never goes out of style.

# Finish. Touch. Transform.

Faucet finishes are often the first thing we notice; they have become the silent narrators of bathroom design.

Bathrooms often appear complete long before they truly are. Walls are tiled, mirrors mounted, lighting planned. But even the most carefully designed space can feel unresolved – as if something essential is missing. One detail, often installed last, carries a surprising amount of weight: the faucet. Not just for its function, but for its finish.

In contemporary design, faucet finishes have become a decisive element in how bathrooms are perceived and experienced. No longer limited to classic chrome, the newest collections expand the design vocabulary with curated matt tones, brushed metals, and warm, tactile surfaces. These finishes don't merely complete a space – they transform it.

Kay faucet, p.127

## Finishes that define a space

Every surface tells a story: through light, texture, and touch. With the introduction of brushed copper and brushed graphite, the palette expands into warmer and deeper tonalities, enriching interiors with subtle nuance and character.

Brushed copper combines natural warmth with a refined metallic sheen. Developed with the PVD Everlux process, it combines durability and color stability with remarkable technical precision. Its resistance to corrosion keeps the surface pristine, even after years of daily use. Its softly brushed surface conveys a discreet sense of luxury, evoking a timeless aesthetic that bridges contemporary and classic design environments alike.

Brushed graphite, evolving from the previous gun-metal tone, introduces a more defined and contemporary expression. Its subtle reflections and muted depth create a calm, architectural presence. It brings a sense of balance and restraint to any space.

Together with chrome, matt black, matt white, brushed brass, and stainless steel, these finishes form a refined spectrum of tactile experiences. Each surface interacts differently with light, tex-

ture, and material context. Sometimes blending seamlessly, sometimes creating a striking point of contrast. More than a visual choice, a finish defines how a space feels and ages over time.

With this expanded palette, design becomes an exploration of atmosphere. From warmth to precision, reflection to depth. Because what we touch every day should not only perform beautifully, but last beautifully too.

## Touch That Speaks Design

There are many surfaces we touch in a bathroom – but the faucet is where function, material, and human gesture come together in the most deliberate way. Tiles, cabinets, mirrors: they create the backdrop. Faucets, by contrast, are the point of contact. They are adjusted, held, turned – often several times a day. This makes the finish not just an aesthetic choice, but a haptic one.

A cool matt surface might signal clarity. A brushed tone might evoke softness. A glossy finish might lend a sense of precision. But beyond the physical touch, the finish also interacts with its surroundings – catching light, softening geometry, or providing visual counterpoints within the space. In contrast to polished stone or raw concrete, brushed or matte metal finishes introduce a softer, warmer touch. Against wood, it might introduce a precise, balancing accent.

**Whatever the choice, the finish shapes our physical experience of the space – quietly, but continuously.**

## **From final step to first impression**

Choosing the right finish is no longer a question of preference alone – it's one of purpose. At home, a thoughtful finish adds warmth and tactility. In public or hospitality spaces, it becomes a quiet marker of care – a subtle sign that every detail has been considered. A finish communicates how much thought has gone into every aspect of the space.

The faucet is often among the final elements to be installed. Yet its finish is frequently one of the first things we notice – and one of the few we interact with so deliberately. In that sense, it's not just a technical detail, but a sensorial moment. A visual decision. A tactile habit. A statement of design intent. Which is why, today more than ever, a bathroom without the right finish is not truly finished.

# Built to Fit Your Space

**The new modular bathroom furniture collection Verso brings rhythm and structure to your space – tailored from the moment you imagine how life will unfold.**

There's no single way to live – and no single way a bathroom should be. That's where modular furniture offers something essential: a way to plan spaces that are both structured and open – designed around your needs, your routines, and the room itself.

Verso builds on this logic with a system that brings rhythm and structure to your space – tailored from the moment you imagine how life will unfold. But unlike many 'flexible' solutions, Verso's modular-

ity begins before you've even chosen a basin. It's not only about adapting to change years later – it's about building for it from the start.

Whether you're furnishing a compact bathroom or planning for a growing family, Verso offers a system that responds to space, rhythm, and routine – right from the moment you imagine how life will unfold. And to make that vision tangible, an online configurator helps you explore different layouts, finishes, and combinations – at your own pace.

Allegro accessories,  
p.109  
Luna Frame Ambient  
mirrors, p.107

## Designing Possibilities

The logic begins with a base unit – widths range from 400 to 1200 mm, available in versions with one or two drawers. From there, everything expands: auxiliary units with drawers, open shelving, columns, top cabinets. Countertops are available in 19 mm wood or 10 mm HPL stone finishes, depending on the chosen basin configuration.

Compatible with Ona basins and over-countertop models such as Horizon, Ohtake, Bol and Terra, the system allows seamless pairing with basin types and sizes.

Each element fits within the same visual and technical logic: designed to combine without compromise, to expand without chaos. Over 400 renderings have already been created to show what's possible – but the potential goes far beyond.

Its components follow a shared visual and technical logic: matte black aluminum handles are integrated, not added; anthracite drawer interiors offer durability and contrast. Full-extension soft-close guides come standard.

## A Framework to Suit Every Home

Verso doesn't cater to a single lifestyle – it's designed to support many. For a young professional, it offers compact solutions that make the most of limited space, while allowing for easy reconfiguration over time – ideal for dynamic, urban living. For couples, it becomes a shared canvas: versatile enough to reflect both personalities and evolve with changing routines. And for multi-generational households, Verso brings harmony to complexity – with accessible elements and adaptable layouts that support different ages and rhythms under one roof.

No matter the context, the system stays visually coherent and technically consistent – offering structure without rigidity, and freedom without noise.

Inspira washbasin, p.59  
Nu faucet, p.129  
Hotels Round accessories, p.111  
Luna Frame Ambient mirror, p.107

## Finish It Your Way

Verso's finishes are more than surface choices. They help define how the furniture lives in the space. The palette includes ten tones: matt white, sand grey, terracotta, onyx, white pine, light elm, magnolia, paros grey, beton, and black marquina – with the final three available exclusively for HPL finishes.

From expressive to understated, these finishes allow the system to recede into the architecture or stand out as a design feature. Importantly, each

finish is consistent across components, ensuring that additions or adjustments over time will maintain a harmonious look and feel.

Whether you begin with a single unit or a fully equipped family setup, every surface and colour is designed to evolve with your space – and your taste.

## **Built for Life – Not Just Today**

**The Verso system is designed to remain responsive long after installation. Drawer lighting improves visibility for nighttime routines or windowless bathrooms. Wooden organisers maintain long-term order – particularly in shared or family settings where daily use demands clarity.**

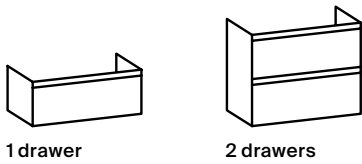

**As your needs evolve, you can expand the system vertically or laterally. Top units, columns, and auxiliary shelves offer seamless storage extensions without disrupting the original layout or design logic. That means no matter how often you adjust or reconfigure, your bathroom stays visually unified and technically coherent – today, and well into the future.**

# The 5 Verso Steps

The Verso modular system allows for customized configurations by combining drawers, doors and shelves, adapting precisely to the different needs of the bathroom space.

# Comfort Redefined

**Take a Seat.  
Why it's time to upgrade  
your toilet.**

The toilet is no longer a second thought when it comes to bathroom design and personal wellbeing. It plays a critical role in improving your daily routine and adding style to the space. Whether you are working on a small redesign, embarking on a full-scale renovation or simply want to upgrade, selecting the right toilet requires a thoughtful balance of style, performance, and space optimisation. From classic silhouettes to tech-savvy smart toilets, Roca has a variety of options that offer something far more than just practicality.

## **Wellness at your fingertips**

For those seeking innovation and a touch of luxury in the bathroom, smart toilets elevate the bathroom experience to new heights. In an era in which wellness and personal wellbeing is at the forefront of society, bringing technology into the bathroom space helps people live more hygienic and comfortable lives. Smart toilets, such as In-Wash® Insignia and In-Wash® Ona, provide next-level features that are designed to improve your everyday, with innovative functions and the Coanda drying effect. This hygienic experience reaffirms a feeling of cleanliness and ease, subtly transforming your everyday.

Smart toilets are ideal for families or in households with multiple users thanks to features such as the self-cleaning nozzle and UV light that helps leave a clean nozzle after every use. The night light is another useful tool for late-night visits to the toilet, whether for parents bringing in young children or to avoid having to turn on a harsh light in the middle of the night.

In-Wash® Vorea, p.49  
Tenue furniture, p.96  
Luna Ambient mirror, p.107  
Ona faucet, p.131  
Tempo accessories, p.108

Additional benefits include heated seats and soft-close lids that bring ease and comfort to the bathroom experience for users of all ages. For those who are looking to upgrade to a smart toilet but prefer a more standard toilet design, Roca's newest model, the In-Wash® Vorea perfectly adapts to both. This advanced toilet blends seamless technology and sleek design to make it a discreet and elegant smart toilet that fits into any space.

By connecting your smart toilet with the Roca Connect App, users can program daily operations, oversee water usage and energy and prepare the toilet before and after use. Further innovations, such as the remote control feature is extremely beneficial for those with mobility concerns, while also being useful for everyday use, including pre-heating a seat or turning on a night light.

Next page:  
In-Wash® Insignia, p.47

### The most innovative design

In-Tank® technology is one of Roca's most innovative designs in the bathroom space and is used in the In-Wash® collection of toilets, including Insignia and Vorea. By integrating the tank into the bowl, there is no need for a concealed cistern, thereby taking up less space and offering more versatility when it comes to the design of your bathroom.

## Finding the perfect fit

There are many factors to consider when deciding on a toilet, foremost among them, how it will fit within your bathroom and how it functions with your needs. When it comes to design and adapting to the space, there are wall-hung models and back-to-wall close coupled models. Wall-hung models free up floor space and visually open up the room and back-to-wall models have a more traditional look and are easy to install in any type of space.

Two of Roca's latest designs, Tura and Ona, reflect the elegant, forward-thinking approach to bathroom design. The Tura and Ona collection are made in both wall-hung and back-to-wall models. Tura has an appealing geometric shape with a unique bevelled base and comes in a white and matt white finish. Its modular form is timeless and complements any design style.

Ona's rounded wall-hung model comes in both a compact form – ideal for smaller bathroom spaces, as well as standard size. It is available in several finishes including matt white, white and matt black, for a sophisticated look. Added features such as Roca's Rimless® and Supraglaze® ensure longevity and enhanced hygiene.

**Whether you're opting for a classic design or embracing cutting-edge comfort, the best toilet is one that reflects your space, lifestyle, and personal aesthetic. Consider it an investment in both everyday function and long-term satisfaction – a quietly essential element of your bathroom's overall design.**

Creating space with meaning

# Colour Your Day

We spend nearly an hour each day in the bathroom, making it one of the most personal and intimate spaces in a home. It's where we begin and end our routines, take a moment for ourselves and recharge. That's why how it's designed matters, not just in terms of function, but in how it makes us feel.

Many are drawn to soft neutrals and simplicity, while others find their expression through bold contrasts, rich textures or unexpected colour. There's no single right way to design a bathroom, only the one that reflects you and becomes an extension of your personality.

However, exploring new colours, materials or finishes can sometimes feel daunting. The challenge isn't imagination, but knowing how to begin. Roca's designs simplify the process, making it easier to add personality and style, so your bathroom feels just right for you.

# The final touches are where colour plays a bigger role.

## Match Your Mood

When you think about designing a bathroom, what's the first thing that comes to mind? For most people, it's tiles or paint. But actually, it's often elements like flush plates, faucets and furniture that pull the whole space together, both visually and practically. There's real science behind it: soft blues and greens can help us feel calm, while warmer, red tones add a sense of warmth and energy. Neutrals, on the other hand, keep things feeling balanced and timeless. In a room that's all about slowing down and recharging, even subtle colour choices can make a real difference. That's why Roca's PS Plates are designed with a focus on mood and atmosphere as much as innovation.

Available in finishes ranging from brushed brass and rose gold to raw materials such as oak, glass, wood, ceramic, slate and concrete, and even bold colours like honey yellow, mint green and cobalt blue, they let you add personality in a small but impactful way. The wide range of colours and materials means you can perfectly complement your bathroom's style or shake things up with a pop of colour. The challenge isn't imagination, but knowing how to begin. With features like small dimensions, customisable designs and flush wall integration, they combine smart functionality with refined style. In a well-designed bathroom, even the smallest details count.

That same attention to detail carries through to Roca's faucets. Inspired by Mediterranean colours, our Nu faucet collection adds a playful and vibrant touch to any setting. It comes in six glossy finishes, including mint green, blue, honey yellow, titanium black, glossy white and chrome, all of which are also available in the PS Plates range. Mix and match the two collections to create a look that takes you right back to the coast.

accessories, p.111  
PS3 dual flush plate, p.75

## Designed to Flow

Just as flush plates can shape the atmosphere, larger furniture pieces play an equally important role in defining your bathroom's style and feel. Roca's Volia bathroom furniture collection takes this idea further by effortlessly blending colour, design and functionality. The basin and base unit share the same finish, creating a sleek, unified aesthetic that feels both modern and sophisticated. Whether you go for matt white, onyx, or sand grey, this colour match brings a calm presence to any bathroom.

That said, colour isn't the only thing that makes Volia eye-catching. Its softly rounded edges and generous storage are designed with real life in mind. Inside, an anthracite grey interior pairs with natural veneer organisers to keep things tidy and a clever space-saving syphon creates additional space. The drawer glides open like a dream thanks to smooth, premium hardware. And just like that, voilà, every inch in your bathroom with Volia is put to good use!

While Volia shows how a unified look can transform a space, it's just one of several collections that bring a new dimension to colour at Roca. Ona, inspired by the Mediterranean, comes in tones like matt green, sand grey and light oak. Optica adds a playful pop of contrast with colours like steel blue, light ash and walnut. Tura, shaped by architecture, introduces earthy shades like light terracotta, noble grey and light elm. Each collection makes a statement in its own way, highlighting how colour can set the energy of any bathroom.

# From Routine to Retreat

What's the vision behind your bathroom? One that energises you as you start the day, or one that helps you unwind and relax? Or maybe a bit of both? When it comes to the bathroom, you're not just choosing tones or finishes; you're crafting a curated atmosphere where colours, textures and materials all come together to bring your vision to life. From subtle to standout, it can become a space that feels natural, comfortable and built for your day-to-day routine. Go ahead and make it your own!

Aquafy faucet, p.157

# Breaking the Bottle Habit

Working towards a more sustainable planet.

Instant fresh water should not be a luxury, but a logical standard. Roca Aquafy offers a waste-reducing alternative to bottled water that integrates into everyday routines and reframes how we treat one of our most essential resources.

<sup>(1)</sup> Annual consumption figures are based on the Adequate Intake (AI) of 2.5 L/day for adult males, as established by the EFSA Panel on Dietetic Products, Nutrition and Allergies in the Scientific Opinion on Dietary Reference Values for Water (2010).

<sup>(2)</sup> Energy consumption data are based on Gleick, P. H., & Cooley, H. S., Energy implications of bottled water, Environmental Research Letters (2009).

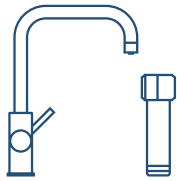

## The numbers behind the bottle

A ritual so ordinary it nearly goes unnoticed – until it doesn't. In many homes, tap water isn't drinkable. So people buy bottles. Again and again. From the store, up the stairs, into the fridge. Finally into the bin, plastic emptied, trust temporarily restored.

A person drinks about 900 litres a year<sup>(1)</sup>. Bottled, that means around 1,000 containers<sup>(2)</sup>: caps, labels, crates, delivery routes and industrial energy. Producing just one bottle often requires 1.3 to 1.5 litres of water to make it. That is even more than the bottle holds, and sometimes up to 17 litres, depending on source and method. Multiply that by thousands and it becomes a habit embedded in waste.

---

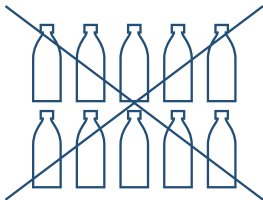

## A single faucet, a powerful impact: sustainable hydration that saves water, plastic and CO<sub>2</sub> emissions.

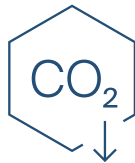

1,200 litres

5,581 glasses

800 bottles

199,250 g<sup>(3)</sup>

Equivalent to over  
1600 km in car travel

<sup>(3)</sup> CO<sub>2</sub> equivalencies for vehicle travel are calculated using average passenger vehicle emission factors defined by the U.S. Environmental Protection Agency (EPA) and the European Environment Agency (EEA) (approx. 182 g CO<sub>2</sub>/km).

<sup>(4)</sup> Scientific evidence on nanoplastics in bottled water is based on findings published by the Proceedings of the National Academy of Sciences (PNAS), “Rapid single-particle chemical imaging of nanoplastics by SRS microscopy” (2023), and the National Institutes of Health (NIH), Plastic particles found in bottled water, NIH Research Matters (2024).

---

## One filter instead of a thousand

Beyond water consumption, plastic’s scale is startling: around 600 billion bottles were produced globally in 2021, generating roughly 25 million tons of plastic waste, most of it unrecycled. Even more invisible: bottled water can contain up to 240,000 nanoplastic particles per litre<sup>(4)</sup> – tiny fragments from packaging, still poorly understood in their effect. So what if the effort could stop without compromise? What if clean, filtered water came from the same place, only better?

Roca Aquafy delivers filtered water from the faucet: no plastic, no transport, no hidden waste. The five-stage filter eliminates chlorine, limescale, microplastics, heavy metals and even viruses. One filter handles up to 1,200 litres that would be an entire year’s worth for one person. One filter, one load of responsibility instead of a thousand bottles.

## No new ritual – just better water

It isn’t about convenience. It’s about care for yourself and for the environment. No bottles to ship. No cooling or recycling energy. No extra purchases. Just water whether on demand or at home, in a way that fits everyday life.

Aquafy separates filtered and unfiltered water through two dedicated outlets. No guessing, no mixing. The faucet quietly delivers precision. Installation is simple, filter changes tool-free. With its refined design and finish options, it adapts and doesn’t demand attention.

Aquafy faucet, p.157

## Designed to integrate, not interrupt

Aquafy is designed for kitchens. It blends in seamlessly, quietly and naturally. The filtration device tucks neatly into the space under your counter, with no need for changes or adjustments. Faucet options range from single to dual outlets, all with separate channels to avoid mixing filtered and unfiltered water. The system includes a built-in indicator that signals when the filter needs replacing. Installation is straightforward; for optimal performance, professional fitting is recommended but not required.

## A small shift, a broader impact

The appeal of filtered water at home has long been framed as a private upgrade. But in offices, small hospitality settings or short-stay apartments, it can become part of a larger rethink: what does comfort mean when it includes access to clean water – without packaging, logistics or user confusion? Aquafy answers that not with new rituals, but by removing the need for them. A familiar gesture, only cleaner.

Sustainability is also engineered in: Aquafy includes a Cold Start feature which defaults to cold water first, preventing unnecessary boiler activation and reducing CO<sub>2</sub> emissions.

## A well-designed system operates seamlessly.

Previous page:  
Aquafy faucets, p.157

On this page: Aquafy  
faucets, p.157

## Aquafy reframes everyday consumption

Most people can recall roughly how much bottled water they use; they can repeat the figures because they're tangible. And once those facts land, the solution becomes mundane almost self-explanatory.

The best design doesn't demand attention – it supports new habits by making them feel familiar. Aquafy doesn't disrupt. It integrates. One system. One gesture. One step closer to better living.

### Andreu Carulla

As a child, Andreu Carulla (Girona, 1979) dreamed of becoming an inventor. This is evident in his sustainable designs, full of craftsmanship, which do not disregard technology, innovation, or the simplicity of materials and forms. From his studio by the lake in Banyoles (Girona), far from the hustle and bustle of the big cities, he has been reinventing tableware, furniture, lamps, and interiors since 2006, following a flexible principle: to create pieces with a conscience.

Creative director of Calma, Isist Atelier or El Celler de Can Roca, some of his creations include the interior of the Spanish Embassy in Helsinki, the restaurant "Normal" in Girona, and the "Calma" chair and "Bolet" stool, among many other small objects of desire that are born of his curious and ever-alert mind.

Andreu Carulla received the ICONIC Award 2023 for his innovative Tura collection.

### Ruy and Rodrigo Ohtake

Ruy Ohtake (1938–2021) was one of Brazil's most celebrated architects, known for his bold, modernist designs and innovative use of form. From Hotel Unique to his projects in the Heliópolis favela, his work has left an indelible mark on São Paulo's architectural landscape. Ruy's multidisciplinary approach extended beyond buildings to include product design. He won several awards, including the "Best of the Best" Red Dot Design Award in 2019 for his Ruy Ohtake collection for Roca.

In 2022, Rodrigo Ohtake (b. 1984) took over the family practice following the death of his father, Ruy Ohtake. A graduate of FAU-USP with international experience, Rodrigo had already established his own studio in 2011, which he later merged with his father's to create Ohtake, a multidisciplinary studio focused on architecture, design, urbanism and innovative building technologies. Rodrigo's approach to design reflects his father's spirit, making no distinction between a design product and an architectural product. This mindset is evident in his recent expansion of Roca's Ohtake collection with new basin models and a bathtub that fuse organic forms, technology and functionality.

# Everlux

A highly durable finish which adds a touch of elegance to faucets and shower accessories.

**Sophisticated Finish**  
Everlux provides an exclusive and stylish finish that adds distinction and singularity to any bathroom space.

**Resistant**  
Its ultrafine coating is made of highly durable metals, resulting in a surface extremely resistant to cleaning products, dings and scratches.

**Chemical-Free**  
Made through a unique production process which does not use or generate harmful chemicals.

## Stefan Diez

Stefan Diez is a German industrial designer known for his innovative approach to materials, circularity and production methods. Trained as a cabinetmaker before studying under Richard Sapper, he founded Diez Office in 2003. His Munich-based studio collaborates with brands such as Rosenthal, Thonet, HAY, Magis and Vibia, shaping products that merge industrial precision with a human-centered design philosophy. Since 2018, Diez has led Industrial Design at the University of Applied Arts Vienna, mentoring the next generation of designers.

At the core of his work are his Circular Design Guidelines, which promote durability, reparability and adaptability – minimizing environmental impact while ensuring long-term relevance. In the development of Kay, designer Madeleine Wieser played a key role, ensuring that its design reflects Diez Office's commitment to precision, material intelligence and essential form.

## Studio Inma Bermúdez

Inma Bermúdez (Spain, 1977) and Moritz Krefter (Germany, 1978) are the two concave and convex faces of the studio that has designed the "Nu" collection. "Moritz is the millimetre, the perfection, the technique," she says. "Inma is the forms, the language, the concept," he replies. With a studio and home in Valencia, they have been working for companies around the world since 2007, creating emotional objects that never lose sight of their function. Their projects combine German essence and Mediterranean light, humour, irony, simplicity and respect for the environment. Their commitment to sustainability dictates the future and increasingly the present, which they imagine as respectful of materials, products and processes.

## Benedito Design Studio

Founded in Barcelona by Ramon Benedito and Maite Prat, Benedito Design Studio has been devoted to product design and industrial development since 1973. In 2004 the architect Gae Benedito joined the company and has been from then on in charge of advanced projects as well as monitoring the latest technological trends in close collaboration with the designers and technical engineers that make up the current Benedito Design team.

The studio is primarily focused on the design of electronic and computer appliances, technical and scientific instruments, machines and tools, lighting fixtures, domestic objects, elements for installations and construction, packaging, and furniture.

"We are passionate about confronting technological challenges, in which we like to push the boundaries between technology, materials and geometry to create inspiring products and solutions characterized by a strong identity. Our goal as designers is to devise long lasting universal outcomes that make a positive impact on people's lives."

# Stonex®

Manufactured from high quality resins, mineral fillers and natural pigments, Stonex® shower trays feature highly durable anti-slip surfaces in a variety of textures that evoke nature.

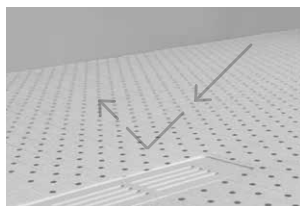

#### Anti-slip

Textured surface that ensures the highest anti-slip levels, while offering a very natural sensation, pleasant to the touch.

#### Antibacterial

Its outer layer provides the shower tray with antibacterial properties in compliance with the most demanding regulations.

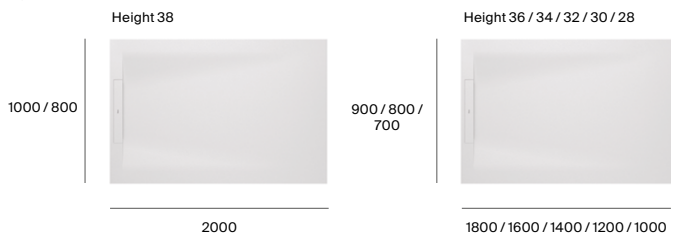

#### Resistance

Its exclusive formula guarantees a high resistance to wear and tear, discoloration, chemical agents and UV light.

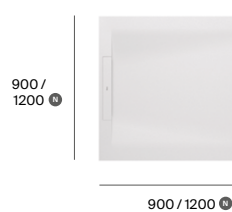

#### Cut-to-size

Easily adaptable to any kind of spaces thanks to its cut-to-size option.

#### Pyros

#### Altura 28

#### Aquos\*

Roca Projects

# The Cloudscape Library of Haikou

**MAD architects reimagines a community library in China for the 21st century, partnering with Roca to provide comfort and style in the bathroom spaces.**

A futuristic library on Haikou Bay designed by the award-winning MAD architects sparks imagination and wonder through its amorphous forms and integration with nature. Roca's commitment to design and sustainability perfectly complemented the architect's vision, creating a seamless connection for the demands of a high-use bathroom space.

Over the past decade, MAD architects have emerged as one of the world's most innovative and transformative architectural studios. Their projects reflect a truly 21st century vision with radical, human-centric designs meeting harmoniously with the natural landscape and sustainable innovations. This approach paired perfectly with Roca's design-led and sustainable bathroom collections, making the collaboration with MAD for the Cloudscape Library, a natural fit.

The library consists of a large central reading area with recessed wood shelves filled with over 10,000 books, offices, a large public area that holds a café, sitting area and a quiet rooftop terrace. Considering the building's importance within the community and its multifunctional space that invites people to spend long hours, the bathroom facilities, which form part of a communal area that includes bike storage and an area for showering and nursing, needed to not only complement the architecture but also be flexible and durable. For MAD, Roca was an

idea partner in providing contemporary products with elegant designs that are meant for longevity and high-volume use. "The products we chose are eye-catching, eco-friendly and energy-saving," said the architects. "They do exactly what we intended, that is to create a comfort-oriented, immersive experience for all visitors." MAD was also confident with the partnership thanks to Roca's longstanding experience in large-scale public buildings.

The architects settled on the classic round basin from The Gap collection – its curvaceous shape fitting perfectly with the rounded, biomorphic shape of the exterior architecture. Roca's Loft touchless faucet was incorporated into the bathrooms, providing an avant-garde style with water-saving technologies, and the Euret urinal was selected, for its essential energy and water efficiency and smart technologies. As the architects noted, "When stepping into the public bathroom space of the library, we are happy that users can perfectly enjoy safe and durable solutions provided by Roca."

The Cloudscape Library is a ground-breaking example of 21st century architecture and it is a space that makes people feel better, connect with one another and experience the waterfront in a new way. Roca's contribution ensures visitors will feel at ease while taking in this transformative library.

Our Planet

Our Home

We are committed to putting people and the planet at the center of every decision we make. Because creating a sustainable future starts with the spaces we live in, and how we produce these spaces is key. That’s why we craft products that bring comfort, beauty, and balance to your home, while protecting the planet every step of the way.

Every detail matters: from eco-designing products that last a lifetime to minimizing emissions, using clean energy, and reducing water and resource consumption. We believe that a home – whether our own or the planet we all share – should be a place of wellbeing, harmony, and care. This belief guides our comprehensive approach to sustainability, which involves taking a wide range of actions, such as reusing and recycling more, improving our processes, and ensuring access to water and sanitation for those who need it most, among many other initiatives.

## EcoDesign

---

**Eco-designing for efficiency and circularity: fostering products that are built to last, repairable, and recyclable.**

We create long-lasting products with easy-to-replace parts, ensuring extended usability and reducing waste.

Our Life Cycle Assessments (LCA) and Environmental Product Declarations (EPD) provide transparency on our products’ environmental footprint.

We design products for easy disassembly and recyclability, such as 100% recyclable shower enclosures, fostering responsible waste management.

Our innovative technologies reduce water and energy consumption, supporting sustainable building certifications such as LEED and BREEAM.

## Responsible Production

---

**Preserving natural resources goes beyond using water efficiently. It begins with sustainable production.**

We are moving towards emission-free factories with pioneering technologies, including the world’s first electric tunnel kiln for sanitary ceramics, aiming for net-zero emissions by 2045.

We rely on renewable energy sources, including Power Purchase Agreements (PPAs) and on-site photovoltaic panels, to minimize our carbon footprint.

Our water neutrality roadmap focuses on reducing, reusing, and recycling water to minimize freshwater consumption.

We reintegrate manufacturing byproducts like chamotte and brass swarf into our production and promote waste reuse across industries to minimize landfill waste.

## Commitment to society

---

**Enhancing people’s lives and building a healthier, more inclusive, and sustainable future.**

We develop solutions for people with functional diversity, reduced mobility, and special needs to ensure comfort, independence and dignity.

Our products and services are designed to promote wellbeing, self-care, and a healthier lifestyle.

Through the We Are Water Foundation, we strive to improve access to clean water and sanitation for those in need.

Through Roca Galleries, we promote global dialog that inspires sustainable design, architecture, and urban planning.

# Protecting our home means safeguarding our people and our planet

Our commitment is to create products that bring comfort, and balance to your home, while protecting the planet we all share.

Our EcoVadis Platinum Medal for outstanding sustainability performance places Roca Group among the top 1% of over 150,000 companies assessed globally.

We are committed to taking action for the Sustainable Development Goals as proud members of the United Nations Global Compact.

# We make people live the best bathroom experience

**Barcelona.  
Since 1917,  
79 Production facilities,  
5 Continents,  
20,000 People,  
170 Markets.**

Roca is a family-owned company dedicated to the design and production of solutions for the bathroom space. From our beginnings, we have grown into one of the largest producers of bathroom products in the world.

Our designs are intuitive and intentional, driven by a philosophy of continuous improvement. Our team of experts works with leading international designers to create products that push the boundaries of innovation, refining your bathroom while bringing comfort and simplicity to your daily routine.

Despite our presence in over 170 markets, we have remained close to our Barcelona roots, contributing to and drawing inspiration from its vibrant design culture. Our products are designed for efficiency and durability, and sustainability is ingrained in everything we do – from sourcing materials to production, logistics, packaging and shipping.

Beyond our products, we address critical challenges through the We Are Water foundation, promoting sustainable water management and improving

access to clean water in disadvantaged communities. We are also committed to fostering talent and creativity.

Our design competitions provide opportunities for emerging designers, while our Roca Galleries and digital platform [rocagallery.com](http://rocagallery.com) host events, discussions, and feature articles on key global issues.

As a leading multinational, we actively participate in key international design and architecture events, demonstrating our commitment to innovation, sustainability and teamwork, and engaging with professionals and the wider public around the world.

We celebrate the small, everyday moments of domestic happiness. At the heart of our business is the desire to develop attractive and functional solutions that make people live the best bathroom experience.
